

UNIoil

Universal Handpiece Oil

KEY FEATURES

Bossklein UNIoil provides effective lubrication for dental handpieces.

The exclusive formulation is safe to use on all types of handpiece including, high speed, low speed and air motors.

UNIoil is a complex oil which contains silicone and anti rust inhibitors, preventing micro rust on vital inner handpiece bearings

The high penetrative ability of UNIoil, with each 500ml can pressurised up to 70psi, provides maximum rotation of internal bearings with simultaneous coating of all surfaces.

Correct handpiece care can significantly extend the life span of a vital piece of equipment, reducing the need for costly repairs or replacements.

As dental handpieces come into contact with bodily fluid and other potential sources of infection, it is important that regular cleaning and maintenance takes place, in some areas this is a mandatory legal requirement. Bossklein UNIoil can effectively remove debris and build up from internal surfaces.

Overall, regular maintenance of dental handpieces helps ensure the safety and well-being of patients, as well as the longevity and efficiency of the equipment.

Universal fittings ensures compatibility with major handpiece brands including Kavo, W&H, Bein Air, etc.

Each can includes a transport cap to avoid accidental discharge and dust build up.

COMPOSITION

Contains white mineral oil, silicone, rust inhibitors and peppermint oil.

INSTRUCTIONS FOR USE

Insert into the back of the handpiece and spray through for one to two seconds immediately after each use and before sterilisation. Wipe excess thoroughly. Important: Hold can in a vertical position when in use. Refer to handpiece maintenance instructions where applicable. Use only as directed. For professional use only.

COMPATIBILITY

Compatible with all dental handpieces. Including high speed, low speed and air motors.

PHYSICAL PROPERTIES

Pressurised aerosol
Peppermint aroma
36 month shelf life from date of manufacture
